

For sale

Twin goat single bucket complete portable milking machine.

Everything you need to milk two goats.

- portable trolley with a 230v / 50hz 0.75kw motor and a 190l/m vacuum pump
- 15 litre vacuum tank
- spring vacuum regulator
- vacuum gauge
- 30 litre stainless milking bucket and lid x 1
- pulsator x 1
- cluster assembly x 2
- set of tubing and cluster assembly rings x 2

The unit was purchased from milkingmachines.co.uk about 10 years ago and is in excellent condition. The unit has been fitted with a complete set of brand new silicon milk liners. The rubber milk pipes were renewed a few years ago, but there is plenty of pipe to do them again (see below).

Negative Points:

- The vacuum pipes and short milk pipes from the Y-connectors to the clusters could do with replacing at some point in the future.
- Some paint has come off the vacuum pump
- The galvanised frame has dulled with age

The following items are also included:

- 1 x Interpuls L02 Pulsator (new and unused - would be £100 inc VAT)
- Interpuls L02 Pulsator Maintenance Kit (new and unused - would be £15 inc VAT)
- Approx 10m of rubber milk tube (new and unused)
- Rotary Liner brush and milk tube brush (used)

The cost of the above items new would be in excess of **£1600** (inc VAT)

Grab a bargain at only **£900** for the lot (no VAT).

Collection only: Lyminster, Hampshire

If you are interested and want more details, please contact Clare and Jason via email (jsholmes@lineone.net) in the first instance and leave your questions or a contact number and we will happily phone you to discuss.
